

**SAFEBET™**  
PATENT PENDING

Patent-Pending SAFEBET™ Design by HBG Design / Manufactured and Distributed by KGM Gaming

[safebetlots.com](https://safebetlots.com)

**PERSONAL GAMING SPACE  
REIMAGINED.**

SAFEBET™ blends continuous air disinfection and viral mitigation with an enhanced, premium gaming space. Encircled by touches of luxury and our patent-pending UVC BREATHING ZONE™ feature, SAFEBET delivers a VIP-level experience emphasizing permanence, protection and peace of mind.

**SAFE BET™ is ideal for all areas of your gaming floor.**

As occupancy restrictions ease, give your property a distinct edge in driving revenue with a high-profile, marketable package that offers optimum safety in a comfortable space.

## SAFETY BY DESIGN

### Permanence and Protection, Perfected for the Gaming Floor.

SAFE BET™ solves human safety challenges through advanced engineering and enhanced aesthetics that improve the casino guest experience, while maximizing space on the gaming floor.

#### 1. FLEXIBLE & FIXED PARTITION WALLS.

Inspire customer confidence through cased partition walls that provide a sense of safety and permanence. Fully customizable finishes and graphics.

#### 2. BREATHING ZONE™ FILTRATION FEATURE.

The UVC BREATHING ZONE™ feature is housed seamlessly at every seat, highlighted by LED lighting. Designed with accessible panel for ease of maintenance/replacement.

#### 3. PARTITION FINS.

Lightweight and easily movable interior cased partition fins provide guest privacy while optimizing flexibility in slot configuration as well as communal play with friends and family.

#### 4. COMFORTABLE SIZING.

Ergonomically designed, the 36"+ spacing delivers optimum separation and ease of accessibility, while enabling the casino guest to be "in the action" while staying protected in their own personal space.

#### 5. HIGH PROFILE OPPORTUNITIES.

The high-visibility of SAFE BET™ draws attention to your casino's commitment to health-conscious technology and a superior guest experience. Endcaps also provide high-visibility real estate for promotional displays, including static graphics, LCD enclosures and opportunities for safety and sanitizing stations.

## BREATHE EASY

### Air Filtration & Virus Mitigation.

The integrated **UVC BREATHING ZONE™** feature is a patent-pending, self-contained, and fully shielded UVC filtration system proven to reduce virus transmission by actively disinfecting and inactivating potentially infectious organisms in the air. Personalized ventilation is key to SAFE BET's strategy of supplying disinfected, pathogen-free air directly to the guest's breathing area. Born in healthcare, UVC filtration sanitizes air that is passed directly in its path, killing viruses, bacteria, fungus and mold while reducing airborne infectious disease transmission.

**The result?** Your guests breathe clean, sanitized and pathogen-free air supplied directly to their personal, protected space.

Laboratory testing validates the performance of SAFE BET's patent-pending **UVC BREATHING ZONE™** feature, demonstrating a pathogen reduction rate of 99.99% for COVID per air pass.

## PROTECTION ZONE

### Indoor Air Challenges, Solved.

The **UVC BREATHING ZONE™** feature is designed as an integrated system within SAFE BET™. **Employees and guests are completely protected with no direct exposure to the fully integrated UVC light inside the unit.**

Product comes with installed, UVC fixture, complete operations manual and UVC light replacement kit including protective eyewear and gloves. Suggested routine maintenance checks every 60 days. Recommended UVC light replacement at 18-24 months.

Ultraviolet light in the C spectrum (UVC) is energy-rich light with a wavelength of 254 nanometers (nm). UVC works by deactivating and damaging the DNA of bacteria, viruses and other pathogens and destroys their ability to multiply and cause disease.

## VIRTUAL ROOF

A Barrier of Safety Across the Casino Floor.

Making casino gaming safe goes together with enhancing the customer experience. The optional SAFEBET™ **VIRTUAL ROOF** adds an additional layer of protection via upper air disinfection and virus eradication. The addition of our specially designed Tech Tube with integrated UVC fixture creates a horizontal plane of enhanced health and safety for gamers in the SAFEBET™ space and beyond. Equipped with custom louvers, the VIRTUAL ROOF focuses virus elimination directly over the slot area covering up to 24 linear feet into the aisles.

This superior level of air sanitization kills viruses, bacteria, fungus and mold while reducing airborne infectious disease transmission by 99.99%. Custom designed louvers also protect guests and employees from exposure to ultra-violet light.

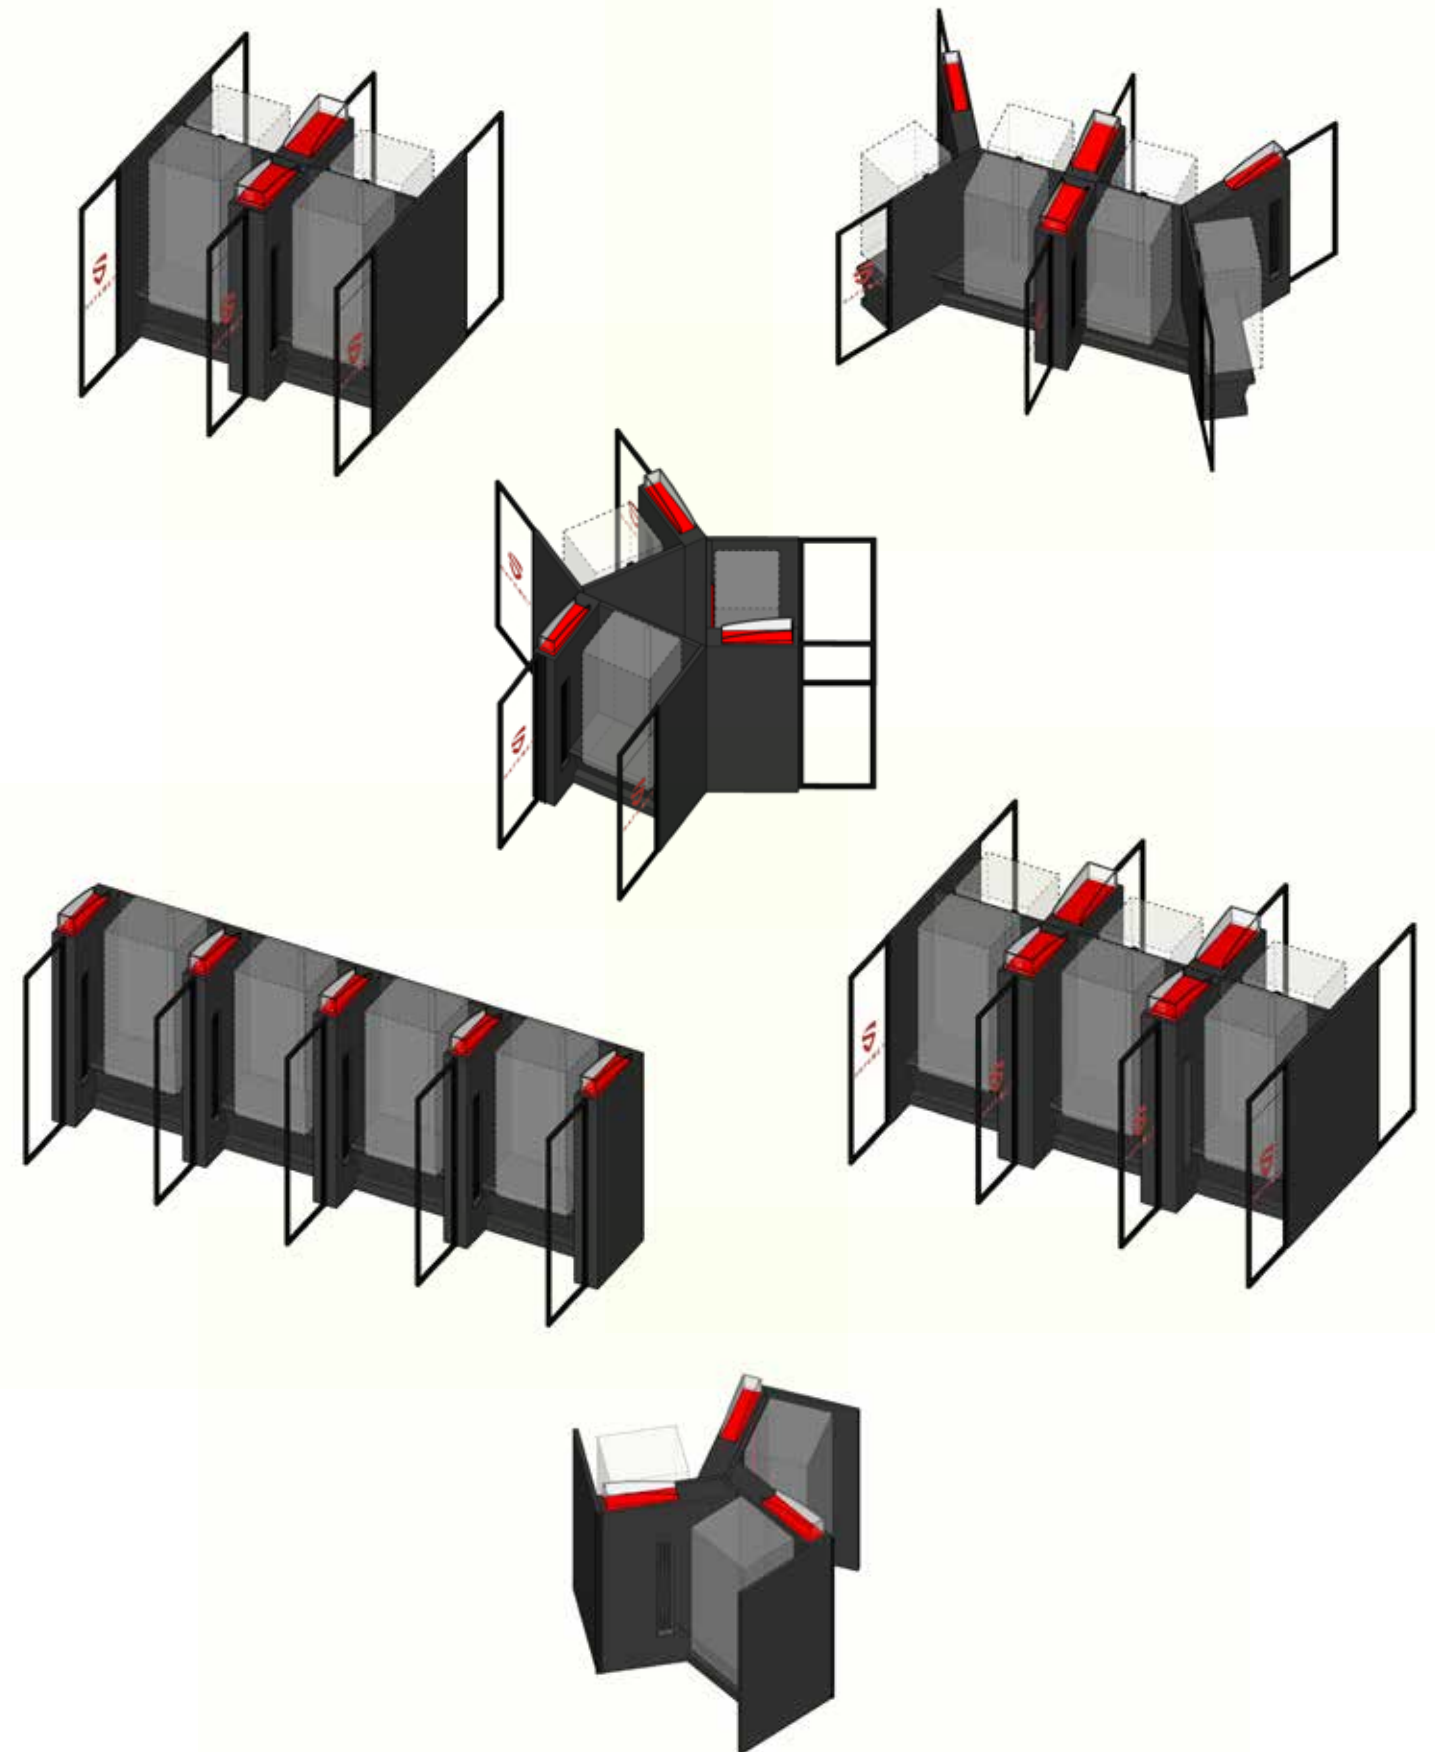

## FLEXIBILITY & FUNCTIONALITY

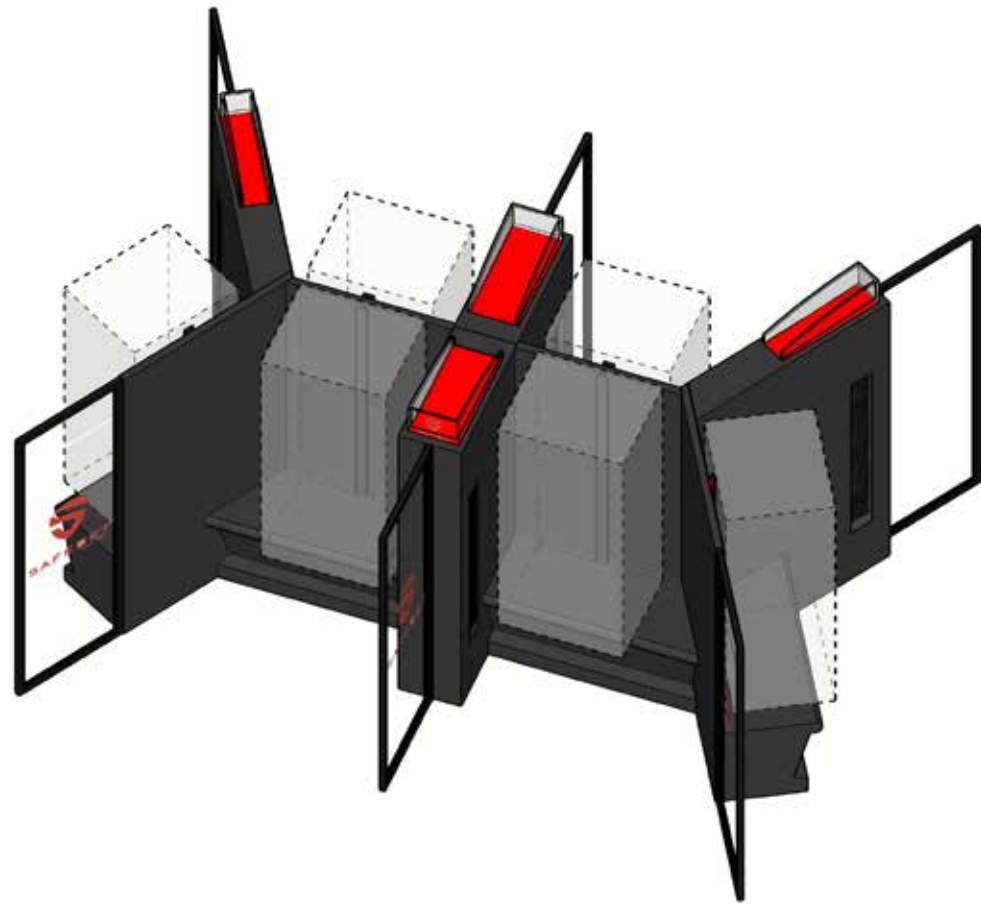

### Advanced Engineering & Functionality Combined with Attractive Aesthetics for Your Casino Floor.

Our manufacturing abilities allow us to create SAFEBET™ in any configuration, all with superior internal access to make best use of your floor space. Ergonomically designed, the 36"+ spacing delivers optimum separation and ease of accessibility. **Smaller footprint options are available.**
